1962

THE SWISS FLORAL CO.

takes pleasure in presenting to you this list of select Conifers. This is only a partial list of our stock and is intended to inspire you to visit our nursery where a great variety of shrubs, perennials, rock plants, etc. are growing, and where a source of pleasure is in store for you. Here you can make your selection of plants and delivery will be made when season is right for planting. In the city free delivery is made to your door.

Those living outside of Portland and sending their order in by mail must include postage for parcel post orders. Evergreens are best shipped by express or freight and may be sent collect. Remittance by money order, currency or for small amounts in 2 or 3 cent stamps will be acceptable. Refunds will be made if stock is no longer available. In case of damage in transit please advise at once when received. We guarantee stock true to name but cannot insure success as this is dependent upon factors beyond our control. Errors will gladly be corrected if advised of on receipt of stock.

INVEST IN EVERGREENS

"Invest in Evergreens" may not be a tip on a rising market -- but it is quite true that such an investment is a "sure thing." In a few short years the value of an evergreen planting is more than doubled. Even as the evergreens grow in value themselves, they are also adding value to your property. Then too they add richness, dignity and beauty to the grounds the year around.

These aristocratic plants used to be considered a luxury but now they are within the reach of almost every home owner. In most localities both spring and fall is looked upon as an ideal time to plant evergreens. So complete your plans now for a new doorway group, a background planting, windbreak or foundation planting. And don't forget the charm of dwarf evergreens in the rockery or as accent plants.

No matter what you have in mind you will find that the evergreen family offers a type for every purpose. There are broad pyramidal types for lawn groups or shelter plantings. If you wish height at the corners or plants for accent, there are tall, slender evergreens ideally suited for such purposes. In the dwarf classes there are globular types and low-growing, half-erect varieties for foundation planting. Slopes that are difficult to plant attractively are a perfect location for creeping evergreens.

Now is the time to make your selections, so consult the following list and then get in touch with us. Our plants are guaranteed to satisfy the most particular buyer.

PROPER LANDSCAPE DESIGN

The ultimate aim of landscape design is to produce the maximum of beauty consistent with utility. To attain this result, it is usually best to secure the services of an experienced landscape architect, whose assistance will not only serve to avoid errors but will also save expense and time.

The Swiss Floral Co. maintains a landscape design department which will gladly aid you in every way. Heading this department is the President of the Co., Mr. J.G. Bacher, who is perhaps the best known garden authority on the west coast, and has been in active gardening business since 1906. Also in the employ of the Company is Mr. T.O. Stapleton, trained landscape architect, who is able to present you with colored perspective and elevation sketches which enables one to see what their yard would look like if properly planned and planted. The smaller the yard the more necessary the plan because every square inch must be utilized to advantage.

We realize that so many factors enter into the proper planning of home grounds, which are so puzzling to the amateur, that the advice of experts is of unlimited value. We invite you to consult with us freely for suggestions and estimates. In plantings of some size, fee for plans will be credited on statement for plant material.

People everywhere are beginning to realize that the planting of their home along modern lines is an investment, not an expense. Your real estate dealer will tell you that a house with a modern designed planting commands a much higher price. A modern development of your grounds is a safeguard to your property and the best savings bank in the world. Phone or write us if you are thinking of garden alterations or new planting. We are able to serve anywhere within reasonable distance. Phone Se. 6100 or Tr. 9865.

The distance of land from the water is a factor in the selection of a site for a new plant. It is necessary to have a certain amount of land to allow for the expansion of the plant in the future. The distance of land from the water is also a factor in the selection of a site for a new plant. It is necessary to have a certain amount of land to allow for the expansion of the plant in the future.

SWISS FLORAL COMPANY

OFFERS A
SELECT LIST OF CONIFEROUS EVERGREENS FOR
WESTERN OREGON

Thuya orientalis aurea nana - Berkman's Golden Arbor Vitae

This is a very compact, low-growing tree with rather formal outline, mostly oval or pyramidal. The tips of the closely crowded branches are golden yellow at certain seasons, especially in late spring.

12-15" @ \$1.50 each
30-36" @ 3.50 "

Thuya orientalis pyramidalis - Pyramidal Arbor Vitae

Erect pyramid-forming arbor vitae of hardy, robust nature and neat appearance. Very fine wherever a formal effect is desired. Can be sheared to any size.

24-30" @ \$1.50 each
30-36" @ 2.50 "
36-42" @ 3.00 "
42-48" @ 3.50 "
4-6 ft. @ 4.50 "
Over 6 ft. \$5.00 and up.

Thuya beverleyensis - Golden Column Arbor Vitae.

This sturdy compact pyramidal growing form has a rich golden color. Can also be sheared to any size.

24-30" @ \$2.50 each

Thuya occidentalis globosa - Globular Arbor Vitae

Extremely hardy flat-growing form of neat habit for planting as border, foundation or rockery evergreen. Seldom exceeding 12-15" in height.

10-12" @ \$1.00 each
14-16" @ 1.50 "
18-24" @ 2.50 "
24-30" @ 3.50 "

Chamaecyparis lawsoniana alumi - Lawson Blue Cypress

Because of the beautiful silvery-blue color and its graceful habit this is one of the most desirable trees for this section. Much used for formal effects.

24-30" @ \$1.50 each
30-36" @ 2.50 "
3-4 ft.@ 3.50 "

Chamaecyparis lawsoniana alba - Lawson White Cypress

A pyramidal-shaped tree with a slender graceful habit. The tips of the branchlets are creamy white. Very desirable

18-24" @ \$1.50 each

Chamaecyparis lawsoniana stewarti - Lawson Golden Cypress

This pyramidal-shaped cypress has foliage of a brilliantly golden color.

16-18" @ \$1.25 each
24-30" @ 2.25 "
30-36" @ 3.00 "

Chamaecyparis lawsoniana nidiformis - Bird's Nest Cypress.

Is so-called owing to its habit of growing flat on the ground, with the foliage forming a birds' nest-like clump of unique appearance. For the rock garden fancier this is nature's special gift in providing the handsomest evergreen for rockery planting. Its foliage is of richest blue-green of unvariable color and the bush rarely exceeds 8 to 12 inches in height, but may spread over a circle of 24 inches in diameter. It will thrive best if sheltered from windy, dry exposures. While yet very rare, this will become the most admired of all conifers, be it as border specimen or for the rockery. We offer fine vigorous specimens.

12" @ \$1.50 each

Chamaecyparis pisifera squarrosa - Japanese Moss Cedar

This name is well applied, for the foliage is very much like fine moss of a silvery grey-green, and soft in texture. Dwarf, compact-growing, rarely exceeding 24 inches in height. Splendid for rockery or for border planting and hardy in all sections of the country.

12-14" @ \$.75 each
16-18" @ 1.00 "
20-24" @ 1.50 "

Cupressus sempervirens fastigiata - Italian Cypress

This fine tree is especially neat for its upright growing habit, with all branches tightly near the leader. Color a distinct light green. This tree loves to grow in sunny dry situations and is hardy for the whole Pacific Coast. For featuring building outlines, its distinct habit makes it invaluable and when used in a cluster planting a garden takes on a distinctive appearance. It merits a much wider use, for it is satisfactory in every respect.

18" @ \$.50 each
Slender $2\frac{1}{2}$ - 3 ft. @ 1.50 "
Heavy $3\frac{1}{2}$ - 4 ft. @ 2.50 "

Cedrus deodara glauca - Blue Deodara Cedar

This beautiful pyramidal evergreen is one of the finest evergreens on the western coast, with bluish-green foliage growing on graceful sweeping branches. Should be given plenty of room to spread out.

3 ft. @ \$2.50 each
4 ft. @ 3.00 "
7-8 ft. @ 7.50 "

The first part of the report is a general
 description of the area. It is a small
 area, about 100 acres in size, and is
 located in the north-east corner of the
 park. The area is mostly open land, with
 some trees and shrubs. The soil is
 mostly sandy, and the vegetation is
 mostly grass and low shrubs. The area
 is used for grazing by cattle and
 sheep. The report also mentions that
 there are some small buildings and
 a road in the area.

The second part of the report is a
 description of the vegetation. It is a
 description of the plants and animals
 found in the area. The plants are mostly
 grass and low shrubs. The animals are
 mostly cattle and sheep. The report
 also mentions that there are some small
 buildings and a road in the area.

The third part of the report is a
 description of the soil. It is a
 description of the soil found in the
 area. The soil is mostly sandy, and
 the vegetation is mostly grass and low
 shrubs. The report also mentions that
 there are some small buildings and a
 road in the area.

The fourth part of the report is a
 description of the water. It is a
 description of the water found in the
 area. The water is mostly from a
 small stream, and the vegetation is
 mostly grass and low shrubs. The
 report also mentions that there are
 some small buildings and a road in
 the area.

The fifth part of the report is a
 description of the climate. It is a
 description of the climate found in
 the area. The climate is mostly
 temperate, and the vegetation is
 mostly grass and low shrubs. The
 report also mentions that there are
 some small buildings and a road in
 the area.

The sixth part of the report is a
 description of the history. It is a
 description of the history found in
 the area. The history is mostly
 from a small stream, and the
 vegetation is mostly grass and low
 shrubs. The report also mentions
 that there are some small buildings
 and a road in the area.

Cryptomeria elegans - Plume Cypress

One of Japan's handsomest conifers, for its foliage is extremely fine and soft to the touch, with that interesting habit of changing its color with the seasons of the year. During the summer it is of soft bluish-green that the coming of fall turns to a pinkish-bronze and by mid-winter, when all other garden color has faded, this tree stands out in rich bronzy-red colors of unique beauty and charm. Towards spring the green again starts to return, almost like a sunrise early in the morning and so gradually as to escape one's attention. It stands clipping well for formal effects.

14-18" @ \$1.00 each
18-24" @ 1.50 "

Taxus hibernica - Irish Yew

Compact columnar growing form with foliage of richest, very dark green color. Will produce bright scarlet berries even as very small specimens. Its very slow growth makes this the most permanent and valuable of all conifers for garden planting.

20-24" @ \$2.50 each
24-30" @ 3.00 "
16-18" @ 1.50 "
18-20" @ 2.00 "

Taxus chinensis - Chinese Yew

The leaves of this variety are more curved and of a lighter green. This plant fruits very profusely. Scarlet berries.

18-24" @ \$2.00 each
24-30" @ 3.00 "
30-36" @ 4.00 "

Retinospora fletcherii

A Cypress of dwarf habit with very glaucous or grayish foliage.

12-14" @ \$1.50 each

ms. A.1.1. = original text.

Dispute between traveling team and the
state of Wisconsin, very dark green color,
all regions except southern border
and a very small area. The very
dark green color is the same as the
dark green color of the southern border
and the dark green color of the southern border.

Retinospera plumosa minima - Miniature Japanese Cedar

Exceptionally neat, hardy evergreen, growing but a few inches high. Perhaps the smallest sort known of Japanese origin. A rare jewel of nature for rock garden planting.

8" @ \$1.00 each
12" @ 1.50 "
14" @ 2.00 "

Picea glauca kosteriana - Koster's Blue Spruce

The bluest of all the spruces. Like Colorado blue spruce, but more distinctive in its rich characteristic coloring. Easily the most beautiful of all evergreens. Naturally conspicuous, it is ideal where standing alone - either as a specimen or in sentinel rows. Always satisfying in shape, it is also a rapid grower, with close branches and lustrous silvery-blue foliage. We offer full branched specimens.

18" @ \$2.00 each
36" @ 5.00 "
48" @ 7.50 "

Picea alba pendula - Weeping White Spruce

The needles of this spruce are short and of a green color. The pendulous branches make this an unusual conifer. It grows fast, thriving in most any situation. A good specimen tree, and a good buy for those who fancy the rare and unusual.

18" @ \$2.50 each

Picea albertiana conica pygmaeus - Dwarf White Spruce

A dwarf spruce, which makes this specimen one of the choicest subjects for the Rock Garden.

10-12" @ \$3.50 each

Redwood - Sequoia

Sequoia is a large tree, growing to a height of 300 feet. It has a thick, reddish-brown bark, and its leaves are dark green, with a serrated margin. The tree is found in the Sierra Nevada mountains, and is one of the most valuable trees in the world.

Sequoia is a large tree, growing to a height of 300 feet. It has a thick, reddish-brown bark, and its leaves are dark green, with a serrated margin. The tree is found in the Sierra Nevada mountains, and is one of the most valuable trees in the world.

Juniperus sabina - Savin Juniper

A low, many-branched type, usually not over two to three feet high. Its branches are spreading, dense, heavily clothed with dark green foliage. A very desirable dwarf evergreen, with many uses. Nicely adapted for covering slopes. A general favorite.

18 inch spread @ \$1.00
24 " " @ 1.50

Juniperus sabina variegata - Variegated Savin Juniper

This silver-leafed form is much slower growing and compact than the preceding variety and ideally adapted for rock gardens, where it lends a touch of color of most welcome nature during the winter periods.

Graded and priced the same as above Savin Juniper

Juniperus pfitzeriana - Pfitzer's Juniper

A low-growing, wide spreading tree. This highly prized ornamental is much used in foundation plantings and will thrive in shade where others would fail. Used in mass effects and as a cover for rough places in landscape work. Foliage gray-green.

16-18" @ \$1.00 each
20-24" @ 1.50 "

Juniperus chinensis prostrata - Prostrate Chinese Juniper

The prostrate creeping form of this juniper is one of the very nicest hardy conifers for use in rockeries, or covering of slopes, as it spreads flat over the ground. They are of slow growth, but very artistic in effect and extremely desirable.

12-16 inch spread @ \$.75 each
16-18 " " @ 1.00 "
20-24 " " @ 1.50 "

Thymus praecox - Wild Thyme

A low, woody perennial, 1-2 dm. tall, with many upright, branched stems. Leaves are small, opposite, linear-lanceolate, 2-4 mm. long, 1-2 mm. wide, with serrated margins. Flowers are small, tubular, 2-lipped, with a long, slender corolla tube. The plant has a strong, aromatic odor and a slightly bitter taste.

Juniperus chinensis prostrata variegata - Variegated Prostrate Juniper

A variegated form of the preceding is also available in which part of the branches are cream colored, giving a pleasing color effect, especially when used in rockeries with dark colored stones.

Graded and priced the same as preceding Chinese Juniper.

Juniperus tamariscifolia

This Juniper is a variety of the favorite Savin Juniper; its native country being Spain and Portugal. Has dark green foliage. Very unique.

10-12" spread @ \$.75
12-14" " @ 1.00

FERTILIZERS

NU LIFE FERTILIZER - An organic fertilizer compound containing all the essential elements of plant food in the proper proportion and insures best results if applied as per directions on containers. Free of weed seeds so often found in ordinary mixtures. The richness of this fertilizer brings out astonishing results and its reasonable cost is a welcome feature to garden maintenance.

Put up in cartons of 2 lbs. at \$.25
5 " at .50
10 " at .75
25 lb. bags at \$1.25
50 lb. " at 2.00
100 lb. " at 3.50

RAW BONE MEAL - A most dependable slow acting fertilizer, harmless to roots and influencing profuse flowering of plants. Two to three months elapse before results become noticeable, but the result may last a year or more. Use 100 lbs. on lawns of 2000 square feet of surface for a good application.

Price per 100-lb. sack \$3.00
50-lb. " 1.75
Less than 50 lbs., 4¢ per lb.

PEAT MOSS - While not a fertilizer this is an ideal natural humus that acts as miniature sponges in your soil. Absorbs and holds many times its own weight in water. By applying this on your garden and spading it in it acts both as a soil loosener and moisture retainer. Serves as an excellent mulch. Avoid putting it around limo-loving plants. Per bale, weighing between 125 to 150 lbs., \$2.50, f.o.b. Portland

1. The first part of the report is devoted to a general description of the project and its objectives.

2. The second part of the report describes the methodology used in the study, including the selection of subjects, the design of the experiment, and the procedures for data collection and analysis.

3. The third part of the report presents the results of the study, including the data collected and the statistical analysis performed.

4. The fourth part of the report discusses the conclusions drawn from the study and the implications for future research.

5. The fifth part of the report contains a list of references and a list of figures and tables.

6. The sixth part of the report is a summary of the findings of the study and a discussion of the limitations of the study.
